## COMMISSION MEMORANDUM

TO: Finance and Citywide Projects Committee

FROM: Kathie G. Brooks, Interim City Manager

DATE: November 9, 2012

SUBJECT: **DISCUSSION REGARDING DISPOSITION OF SURPLUS EQUIPMENT**

### BACKGROUND

Equipment or vehicles that are considered surplus have been fully depreciated and are no longer in use by the associated department.

Pursuant to Section 2-315(c) of the Miami Beach City Code, the City Manager or his/her designee shall have the authority to sell all surplus stock that has become unsuitable for public use. Additionally, the City Manager or his/her designee shall have the authority to donate surplus stock to another governmental entity, agency, or not-for-profit organization without placing the surplus stock for public sale if the donation serves a charitable or public purpose, the donation is in the best interest of the city, and the value does not exceed a replacement value of \$25,000.

The City manager put a policy in place in March 2010 which outlines the process for handling surplus equipment as it pertains to an auction (Attachment A). It basically states that as new replacement vehicles arrive, the older ones are returned to Fleet Management who in conjunction with Procurement, contacts an auctioneer to facilitate disposing of the equipment resulting in revenue for the City. Such was the case with an auction of vehicles and equipment held on September 29, 2012 which generated \$426,420.

The City Commission has on a number of occasions voted to donate vehicles to other governmental agencies and causes. Most recently in 2010, the Commission voted to donate a surplus ambulance to Peru and two (2) others as part of the City's Haiti Relief efforts.

The administration has received a request from the Village of Biscayne Park to acquire surplus police vehicles. Sale or donation of equipment to other municipalities would eliminate the need to remove the lights and safety equipment installed in the vehicle.

### ANALYSIS

As part of each fiscal year's budgeting process, a replacement list of vehicles and equipment is prepared and included. Attachment B contains the vehicles and equipment targeted for replacement for FY2012/2013.

Once a number of vehicles are replaced, an auction is planned to generate revenue and free up needed storage space. A vehicle/equipment auction involves completing a wide range of tasks that starts weeks in advance of the actual auction day. Pre-auction activities include: preparation of final list of vehicle/equipment to be auctioned; special packaging/palletizing of surplus or obsolete parts and equipment; collection and verification of all serial and equipment numbers; transportation of all inoperable or non-road rated equipment to the auction site; and complete vehicle/equipment decommissioning work which can be extensive:

- Removal of safety equipment from Police vehicles such as: light bars, flashing lights, gun rack, prisoner partition, siren, security device, gun rack, radio equipment, etc.
- Removal of rear plastic prisoner transport seat in police interceptors
- Re-installation of original manufacturer rear seat in Police interceptors
- Re-connect horn in Police interceptors
- Removal of graphics from vehicles and equipment (city seal)
- Removal of fuel management system hardware and wiring
- Removal of license plate

Additional resources are required with other entities including coordination with the Parking Department for vehicle storage and auction site, Procurement for an auctioneer, Miami Beach Auto Tag Agency for collection of taxes, and the Police Department for security purposes. There is also a meeting with the auctioneer on site the previous day to coordinate vehicle identification, auction sequence, arranging and storing all vehicle keys and titles in the auction sequence.

On the day of the auction, staff is present and tasked with:

- Starting & moving equipment
- Title / purchase documents management
- Vehicle / equipment keys management
- Equipment security
- Assistance with loading equipment on buyer trucks
- Verify that VIN number of vehicle matches number on purchase documents

The final step is the issuance of "Retired from inventory" form for each vehicle or piece of equipment to Finance – Fixed Assets. The overall process is labor intensive, requiring approximately 250 labor hours, including overtime, for the most recent auction on September 29, 2012. The results of the auction are tabulated in Attachment C.

Procurement has been working with The Public Group, LLC. to provide for an online alternative to a public auction. Equipment is posted on the company's website: [www.publicsurplus.com](http://www.publicsurplus.com) and bidding is performed in real time. Photographs as well as descriptions are posted with a deadline for bids. Automatic auction extensions are built into their Public Purchase product. If a bid is placed within 3 minutes of the designate end time, the end time will extend for an additional 3 minutes. This ensures a true "auction" environment and guarantees that every vendor has the opportunity to place his or her best bid. Detailed reports are also produced and provide an audit trail of each bid. This process may prove more advantageous for specialty or emergency equipment as well as odd items such as surplus obsolete parts.

In some instances, a piece of equipment is traded in during the acquisition of a replacement. The vendor provides a quoted price for the trade-in. The price quote is compared with the values from on-line auction sites for the same equipment in like condition. If the values are similar, the equipment is used as a trade-in. If the values are not comparable, the auction company is consulted to determine the typical pricing that might be received at a live auction. The best return on the

original investment is targeted.

In other instances, equipment may be donated for a charitable or public purpose. On April 13, 2011, the Commission approved a recommendation of the Administration to donate three (3) police pursuit vehicles to the Miami-Dade College School of Justice. This was done to offset costs associated with the city's use of the police driving range. A prior donation was made in 2007.

On April 14, 2010, an item was placed on the Commission agenda to request approval to purchase two (2) Medtec ambulances. At that time, there were four (4) rescue vehicles that were no longer in service. The vendor offered \$34,000 as a trade-in allowance towards the purchase of the new ambulances. The Commission voted to donate one (1) to Peru and two (2) to Haiti. These vehicles were donated "as is". All costs associated with transporting or exporting and any repairs required to make usable were made by the recipient.

In December 2008, similar action was taken by the Commission to sell a pumper truck and a ladder truck for an amount of \$10,000. This equipment was sold "as is" to the Cuerpo General de Bomberos Voluntarios del Peru (Volunteer Firefighters of Peru).

In March 2002, the Commission donated one (1) fire engine to the City of Ica, Peru.

In May 1998, two (2) Ford E250 police paddy wagons and one (1) Ford E350 fire rescue vehicle were donated to the City of Cozumel, Mexico. At the same time, one (1) E350 fire rescue vehicle, one (1) fire truck-pumper, three (3) pickup trucks, and one (1) "lot" of new parts were donated to the City of Ica, Peru.

The City also sold a few vehicles to Sheriff's Office of Calhoun County, Georgia. They were sold through auctions and direct offers to the City in accordance with the City Ordinance.

Equipment Number	Year	Make	Model	License	Dept	Auction	Sold

RECEIVED

2010 MAR -4 PM 12: 00

MEMORANDUM  
CITY CLERK'S OFFICE

TO: Edward L. Tobin, Commissioner

FROM: Jorge M. Gonzalez, City Manager

DATE: March 3, 2010

SUBJECT: Process for Handling Surplus Equipment Prior to a Public Auction

010-2010

This memo is in response to your request for information regarding the process for handling surplus equipment prior to a public auction.

City surplus stock assets (i.e., items that have outlived their useful life; or are no longer needed by any City department; or are no longer cost effective to maintain; or that have become obsolete), are sold via public auction, to the highest bidder in an "as is" condition. Public Auctions are scheduled on an "as needed" basis with at least two (2) auctions per year. Most of the auctions are scheduled when Fleet Management notifies Procurement that there are a significant number of vehicles that need to be sold.

Each department determines the usefulness of their items and is responsible for their surplus assets until the date of a public auction. Most of the items that are declared surplus are stored at the Miami Beach Convention Center (MBCC) storage area. The surplus items are primarily furniture and computers. The furniture declared surplus is no longer needed by City departments because it has outlived its useful life (i.e., worn out) or is damaged beyond repair. All items must first be declared excess (i.e., no longer needed by a City department) and must be offered to other City departments. If no other City department needs the item, then it's declared surplus.

Surplus computer equipment is handled in a similar fashion. It is important to note that surplus computers have very little value since IT technicians remove all physical disk drive media, and then render the drive inoperable by using a media demagnetizer. The demagnetizer essentially subjects the media to an intense electro-magnetic field, which renders the disk drive media and any data residing on it completely inaccessible and inoperable. Once the disk drive media has been rendered inoperable and useless, it is sent to Miami Beach Convention Center to a separate locked room designated for computer equipment storage until an auction is scheduled. All documentation for surplus computers that have been slated for disposal is submitted to Procurement at the time it is placed in storage.

When vehicles and other large equipment are declared surplus, they are replaced, on a one for one basis, as the new vehicles are received. This generally occurs over a short period of time each year. As the new vehicles or equipment are received, the surplus vehicles are returned to Fleet Management, who stores the vehicles and notifies Procurement that an auction is needed.

When Fleet Management notifies Procurement that there is a need to sell a number of surplus vehicles, Procurement contacts the auctioneer to set up an auction. The majority of surplus items in a typical auction are vehicles and computer equipment. Other surplus items typically include worn or damaged office furniture and equipment and a small number of miscellaneous surplus items. Procurement meets with the auctioneer and tours the storage area to review the items for auction. Procurement provides the auctioneer the list of surplus vehicles compiled by Fleet Management and the list of surplus computer equipment compiled by IT and requests that the

auctioneer prepare a catalogue of all other surplus furniture and miscellaneous items in the storage area prior to the auction. Additionally, the Procurement Director meets with the auctioneer, prior to auction and reviews the catalogue of surplus items to be sold.

We have attached the administrative policy for Auctions of City Property which goes into greater detail about the auction itself.

Should you need any additional information please do not hesitate to contact me.

JMG/PDW/GL

C: Mayor and City Commission  
Trish Walker, Chief Financial Officer
