

				Building Department Plan Review Checklist	Permit No.
				Discipline: Fire - New Construction	
es	No	N/A	Comment Ref	Description	Code Reference
				BASIC PRE-SUBMITTAL REQUIREMENTS	
				Cover Sheet	
			B - 1	Clearly define the Scope of Work	City of MB
			B - 2	List all Codes and Editions used	City of MB
			B - 3	Identify the Type Of Construction per code	FBC and NFPA 22
			B - 4	Identify the Occupancy Class per the Building Code and Fire Code	FBC and FFPC
			B - 5	Identify if building will have sprinkler system or not	FBC and FFPC
				Identify: floor area in sq. ft., number of stories, total height of structure and top	
			B - 6	floor height (to determine if high-rise)	FBC and FFPC
				Site Plan	
				Show the entire project site including: roadways, property lines, all bldgs on site	
	Ш		B - 7	(existing and proposed) as well as other structures on the site	NFPA 1
			B - 8	Provided North directional arrow	NFPA 1
			5	Show Fire Hydrants, Fire Department Connections, Backflow Preventor, Post	
			B - 9	Indicator Valves	NFPA 1
			B - 10	Show any parking related to site along with fire dept access	NFPA 1
			B - 11	Identify the scale used. Required scale is 1:20	NFPA 1
				General Plan	
			B - 12	All sheets must be signed and sealed by a design professional	City of MB
			B - 13	All sheets are drawn to scale; scale shown	City of MB
			B - 14	Provide a Key Plan on all sheets	City of MB
			B - 15	Provide a detailed narrative for all phases, when applicable. Show diagrams	City of MB
			B - 16	Clearly label all areas	City of MB
			B - 17	Provide a Title Block along with the project address on all sheets	City of MB
				Fire alarm design document are to be signed & sealed by Florida Engineer for	
			B - 18	projects \$5,000 or more. (Scale - 1/8 inch = 1 foot)	F.S. 633
			D 40	Provide Fire Alarm system battery calculations and spec sheets for components	
			B - 19		F.S. 633
			D 20	Fire Sprinkler design documents are to be signed & sealed by Florida registered	F C C22
			B - 20	Engineer if 49 or greater heads are installed	F.S. 633
			B - 21	Provide Sprinkler system hydraulic calculations and spec sheets on all	F.S. 633
			B - 22	Components All equivalencies must be approved by the Fire Marshal	City of MB
			D - ZZ	Detail/Schedules	City of MB
			B - 23	Provide Fire Stopping penetration details for each penetration type	NFPA 101 chap. 8
			B - 24	Provide Door Schedule including: rating, hardware, width, assembly, etc.	NFPA 101 chap.
			B - 25	Provide Stair Detail including all dimensions: width, headroom, rise, run, etc	NFPA 101 chap.
			D - 23	Provide Handrail & Guard detail including: all dimensions-extension, rejections,	INITA TOT Chap.
			B - 26	height, etc	NFPA 101 chap. 7
	\vdash		B - 27	Provide Ramp Detail including: all dimensions, show slope in ratio, etc	NFPA 101 chap. 7
	\vdash		<u> </u>	Provide a complete Window Schedule including: all dimensions, identify egress	ι / το ι οπαρ. ι
			B - 28	windows, clear widths, sill height above finished floors, etc	NFPA 101 chap. 2
	H			Provide a complete Interior finish schedule: walls coverings, floors finishes,	,
			B - 29	furnishings and draperies.	NFPA 101 chap.
	\Box		-	Provide Wall Types (including its joint assemblies) any shafts and chases shown	
				referenced to detailed drawings on plans; UL or equivalent design details	
			B - 30	J p J J J J J J J	NFPA 101 chap. 8
					·

				LIFE SAFETY PLAN REVIEW:	
				Are the travel distance from most remote area, common path of travel, etc. shown	
4			LS - 1	and measured as per code?	NFPA 101 chap. 7
			LS - 2	Has the occupant load been correctly calculated and shown?	NFPA 101 chap 7
١				Have the required number of Exits with reference to its occupant load been	
_			LS - 3	provided?.	NFPA 101 chap. 7
ı				Are the Exits remote from one another, with the measurements properly shown	
١				on plans? (1/3 of the diagonal if sprinklered or 1/2 of the diagonal if non-	
4			LS - 4	sprinklered)	NFPA 101 chap. 7
_			LS - 5	Are all dead ends within the maximum limits allowed for this occupancy?	NFPA 101
١				Is the Means of Egress (Exit Access, Exit and Exit Discharge) shown clearly on	
_			LS - 6	plans?	NFPA 101 chap.
			10.7	Do all Exit doors swing in the direction of exit travel? Do all doors swing free of	NEDA 46 : .
4			LS - 7	obstructions?	NFPA 101 chap.
_			LS - 8	Does the door swing projection within limits in corridor? In stairs?	
_			LS - 9	Are the floor elevations level on both sides of all Exit doors?	NFPA 101 chap.
			LS - 10	Has the 1/2 in. maximum threshold been shown across all Exit doors?	NFPA 101 chap.
ı				Have Emergency lighting and Exit signs been provided along the entire means of	
			LS - 11	egress?	NFPA 101 chap.
ı				Do all Exits lead directly out of the bldg? (1/2 of the exits can lead back into bldg	
			LS - 12	if fully sprinklered) .	NFPA 101 chap.
			LS - 13	If provided, do the scissor stairs comply with code? Single exit?	NFPA 101 chap.7
ı				Have all exposures with regard to exiting (less than 10' and/or 90 degree angle)	
			LS - 14	been properly rated / protected?	NFPA 101 chap.
			LS - 15	Do any/all qualified outside stairs meet the requirements of the code?	NFPA 101 chap. 7
				Are the exit stair enclosures free from any openings into storage rooms or other	
			LS - 16	unoccupied rooms?	NFPA 101 chap.
			LS - 17	Has Emergency lighting been provided to the public way?	NFPA 101 chap. 7
			LS - 18	If provided, do the qualified Horizontal Exits comply with code?	NFPA 101 chap.
1			LS - 19	Is there a permanent exit path to the public way?	NFPA 101 chap.
1				Are there two separate ways to get to the public way if the exit discharge has	· ·
			LS - 20	exposures (windows, etc)?	NFPA 101 chap 7
1				Has panic hardware been provided on all exit doors with an occupant loads of	·
			LS - 21	100 or greater?	NFPA 101 chap. 7
1			LS - 22	Do the fire doors contain proper hardware (hinges, handles, hardware)?	
1			LS - 23	Are all exiting access corridors properly rated as required for this occupancy?	NFPA 101 CHAP.
1			LS - 24	Have all floor level changes in the Means of Egress been properly addressed?	NFPA 101 chap.
┨			_ 	Does the exit access corridor/pathway have the proper width? (36 inches if less	
			LS - 25	than 50 occupants and 44 inches if more than 50 occupants)	NFPA chap. 7
┨		_	LS - 26	Does the exit access corridor/pathway have proper rating and fire doors?	
┨	_	_	LS - 27	Do all door widths provide the required egress capacity?	NFPA 101 chap. 7
┨			<u> </u>	If Special Locking Arrangements are provided on any exit doors, do they comply	ivi i A TOT Gliap.
			LS - 28	with code and are they allowed by this occupancy?	NFPA 101 chap. 7
+			LO - 20	Do the horizontal - sliding doors in a means of egress have a break away feature	ivi i A TOT Glap. I
1			LS - 29	for exiting emergencies?	NFPA 101 chap. 7
			LO - Z3	IOI EXIGNY CHICLES!	μνιτα τυτυπαρ. <i>Γ</i>

				LIFE SAFETY PLAN REVIEW(cont.):	
				LII L SAI LII I LAN IXL VIL VV (cont.):	
				Are there any curved, spiral or winder stairs being used for a designated exit? All	
			LS - 30	dimensions comply with code?	NFPA 101 chap. 7
				Have all the Vertical Openings been protected as required for this occupancy?	
			LS - 31	Check all floors	NFPA 101 chap. 8
			LS - 32	Are the Exit Stairs fully enclosed top to bottom?	NFPA 101 chap. 7
				Are there any mezzanines, atriums shown on plans and have they been properly	
			LS - 33	addressed per code?	NFPA 101Chap. 8
				Have all of the designated exits been checked to ensure they do not pass	
			LS - 34	through a kitchen? Or lockable room?	NFPA 101
				Has the bldg been provided with smoke control, smoke evacuation systems; If	
			10 25	so, has the sequence of operation been placed within the plans?	NEDA 404
_			LS - 35		NFPA 101
			1.6 2.0	Have all elevators been provided with either elevator vestibules or the alternative	NEDA 404
_			LS - 36	to pressurize the elevator shafts?	NFPA 101
			LS - 37	Are rated walls/partitions free of non-rated panels?	NFPA 101
			LS - 38	Have rated ceiling light fixtures been provided when installed in rated ceilings?	NFPA 101
			LS - 39	Are the stairs for the bldg. being pressurized?	NFPA 101
			LS - 40		
				If the bldg is provided with a sprinkler system, does the design comply with the	
			LS - 41	applicable code?	NFPA 13,13D,13F
				If the bldg is provided with a fire alarm system, does the design comply with	
			LS - 42	required codes?	NFPA 72 & 101
				If the bldg is provided with an emergency generator, does the design / installation	
			LS - 43	comply with code?	NFPA 110
				If the bldg is provided with a fire pump, does the design / installation comply with	NEDAGO
			LS - 44	the code?	NFPA 20
			1.0.45	If the building has a common roof top terrace, have the correct number of exits	NIEDA 404
			LS - 45	been provided and are they remotely located for proper exiting?	NFPA 101
			1.0 40	Is the fire pump located in its own room? (domestic water pump is okay, but no	NEDA 404
			LS - 46	other equipment)	NFPA 101
			LS - 47	Are the Emergency Generator and Fire Pump located above the flood line?	NFPA 37, 20
			1.0 40	Has a man door provided for exiting within a parking garage, when the required	NEDA 404
			LS - 48	vehicle exit is blocked by a security gate?	NFPA 101
			10 40	Are the exit stairs free of any conduits or piping other than the standpipe and fire	NIEDA 101
4			LS - 49	alarm system?	NFPA 101
			10 50	If the property is to be fenced, does the fire department have the required	NIEDA 404
4			LS - 50	access? (20' wide gate and key box)	NFPA 101
			10 54	If the project is mixed occupancy, have the most stringent occupancy	NEDA 101
4		 	LS - 51	requirements been met?	NFPA 101
_			LS - 52	If there is an area of refuge, does it comply with code?	NFPA 101 chap. 7
			10 50	Have all Hazardous Areas been identified and do they comply with the	NFPA 101 chap. 6
4			LS - 53	requirements for this occupancy?	8
			10 54	Has a complete fire extinguisher layout, including size, type and mounting details	NEDA 4 40
			LS - 54	been provided?	NFPA 1, 10
				If there are commercial exhaust hoods, have they been tied into the fire alarm	
			LS - 55	system and protected in accordance with code?	NFPA 96

_				FIRE SPRINKLER PLAN REVIEW:	
				FIRE SPRINKLER PLAN REVIEW.	
-				General	
				Are sprinkler plans signed & sealed by a Florida Registered Engineer? (required if	
			FSP - 1	the scope is greater than 49 heads)	F.S. 633
			FSP - 2	Is the applicable code and edition correct and shown on plans?	City of MB
				Does the Site drawing indicate the point of service from City main, and locations	
			FSP - 3	of the Backflow Preventer, Post Indicator Valve and Fire Hydrants?	City of MB
			FSP - 4	Is the backflow shown on the plans the correct type?	City of MB
			FSP - 5	Do the plans show pipe dimensions and diameter?	City of MB
			FSP - 6	Do the plans show riser locations and dimensions and is the riser accessible?	City of MB
			FSP - 7	Is the outside bell shown on the plans?	NFPA 13
				Are the hanger locations, hanger detail, valves and sprinkler layout clearly shown	
			FSP - 8	on the plans?	NFPA 13
1				Are the water flow devices and tamper switches shown on plans? (Including	
			FSP - 9	those required at the Backflow and PIV)	NFPA 13
_			FSP - 10	Is the inspector's tests shown on the plans and is it remote from riser?	NFPA 13
			ECD 44	Is the location of the FDC shown on the plans and complies with distance to	NEDA 46
_			FSP - 11	hydrant?	NFPA 13
4			FSP - 12	Does the FDC has 7.5 ft clearance on each side?	NFPA 1
4				System Type Is it noted that where a pipe cannot be maintained above 40 F that adequate	
			FSP - 13	freeze protection provisions will be included?	NFPA 13
-			FSP - 14	Is the type of system appropriate for the specified application?	NFPA 13
7			1 01 - 14	is the type of system appropriate for the specified application:	NITAIS
+				Does the system have an electronically monitored alarm valve or water flow	
			FSP - 15	device?	NFPA 13
7			FSP - 16	Is there 100% sprinkler protection?	NFPA 13
7				•	
\dashv				Hazard Classification	
\dashv			FSP - 17	Does the hazard classification correspond to the potential fuel load?	NFPA 13
+			FSP - 18	Is the design density consistent with code classifications?	NFPA 13
1			FSP - 19	Are the sprinkler zones less than the maximum size permitted?	NFPA 13
1			. 0. 10	and the springer agency is a maximum one permitted.	
				Hydraulic Calculations	
			FSP - 20	Are hydraulic calculations and fire flow test results within 6 months included?	NFPA 13
			FSP - 21	Is hydraulic nodal information shown on plans?	NFPA 13
			FSP - 22	Is the calculated zone (design area) the most hydraulically demanding?	NFPA 13
			FSP - 23	Does the zone contain the correct number of heads?	NFPA 13
			FSP - 24	Do the calculations use the correct C factor?	NFPA 13
			FSP - 25	Does the supply curve exceed the system demand?	NFPA 13
			FSP - 26	Do the drawings appear to match the hydraulic calcs?	NFPA 13
