

### **FREE Beach and Dune Workshop**

Wednesday, June 19

6:00 PM to 8:00 PM

Commission Chambers (City Hall, 3rd Floor)

The City's dunes provide a natural habitat to native plants and insects, and serves as a foraging ground for migratory birds. In addition, a healthy dune system provides upland properties with significant protection from hurricanes and storms. During this educational workshop, City staff and a professional dune ecologist will provide an overview on the history of the City's dunes and beach, their value and purpose, their structure, and the City's dune and beach management plans. They will also be available to answer your questions regarding these coastal ecosystems.

This workshop is funded in part, through a grant agreement from the Florida Department of Environmental Protection, Florida Coastal Management Program, by a grant provided by the Office of Ocean and Coastal Resource Management under the Coastal Zone Management Act of 1972, as amended, National Oceanic and Atmospheric Administration Award No. #NA11NOS4190073. The views, statements, findings, conclusions and recommendations expressed herein are those of the City and do not necessarily reflect the views of the State of Florida, NOAA or any of their subagencies.
