

To all members of the Miami Beach Employees Retirement Plan:

I would like to thank all of you for allowing me to serve as a trustee since 06/14/2005. When I was first elected there was a separate plan for General Employees and for Unclassified Employees that was subsequently merged into the current plan. Significant pension benefit improvements were implemented for all members. One thing that has not changed is my commitment to fulfill my fiduciary responsibility to the plan and all of its members. During my tenure I have obtained pertinent educational certifications that are required and /or necessary to make informed decisions with a clear understanding of the issues presented. They allow me to inquire about information from our Administrators, Staff, Fund Consultant, Fund Managers, Actuaries, Attorney's and converse with the Board of Trustees during regularly scheduled and posted meetings in accordance with the laws covering communications between Trustees. I have obtained the following certifications: Certified Public Pension Trustee (CPPT) / Florida Public Pension Trustees Association, Certificate of Achievement in Public Plan Policy (CAPPP) / International Foundation of Employee Benefit Plans, Trustee Educational Development Certificate (TED) / National Conference on Public Employees Retirement Systems, Program for Advanced Trustee Studies (PATS) / Harvard Law School Labor and Worklife Program, International Investing and Emerging Markets.(IIEM) / University of Pennsylvania-The Wharton School. I have also attended local conferences such as Pensions and Investments Annual Conference, NCPERS Annual Conference and Opal Financial's Real Estate Investors Summit right here in Miami Beach after encouraging these groups to bring the programs to Miami Beach. I am attending Continuing Education Programs to maintain these certifications and increase my knowledge of current financial environments, asset allocations, actuarial liabilities and insure that our plan remains well funded and our retirement future is not at risk for you and for me. The members fund a significant portion of pension's costs and do not pay or receive Social Security deductions/ benefits from the CMB employment. The City contributes as well and the earnings on investments from both fund the plan. It is all of our money and we must all have a voice in its stewardship to keep the plan fair, sound and healthy. It would be my honor and pleasure to continue to represent you in this endeavor. If you feel I have served you well and would like me to continue as your elected Trustee I would appreciate your vote.

Sincerely,

Warren W. Green
